Code: 1302

Hydrophilic oils with added essential oils may accidentally enter the eye during make-up removal and cause mild burning. This is why a special preparation has been developed for a smooth and gentle make-up removal, the HYDROPHILIC OIL MAKE-UP REMOVER.
You will appreciate its mildness already on the first use. It perfectly removes oil-soluble substances. It maintains an optimal skin elasticity and provides toning effects. It is particularly useful for the sensitive skin around the eyes. It removes both clinical make-up and water-proof mascara.

Main ingredients: Vegetable oils: almond, wheat germ, walnut. Specific essential oils and medicinal plant extracts. Lecithin. Vitamins A, E, F. Emulsifiers.

Application: Put a few drops on the complexion and work in gently. After the make-up dissolves, wipe it off with a cotton pad, and wash the face with a sufficient amount of water. Toning can be done with a face lotion or a toner. You may then use one of the regenerative facial oils, or a herbal regenerative cream.

Tip: After applying hydrophilic oils, we suggest following up with regenerative facial oils or creams.

INCI: Glycine soja Oil, Juglans regia Seed Oil, Laureth-4, Simmondsia chinensis Seed Oil, Triticum vulgare Germ Oil, Butyrospermum parkii Oil, Prunus amygdalus Dulcis Oil, Sesamum indicum Seed Oil, Macadamia ternifolia Oil, Cannabis sativa Seed Oil, Lecithin, Tocopheryl acetate, Retinyl palmitate, Beta-carotene

Storage: The stated expiry date can be substantially extended by keeping the product in a dark and cold place (ideally in a fridge at 6–10°C).

Best before the date indicated on the packaging. Batch number and volume are indicated on the packaging.
