The schema of the formation of haemorrhoids is not completely clear till this time. There is a multitude of factors which can make their formation easier, e.g. sedentary occupation, pregnancy or giving birth, etc. It is my experience that people who suffer from varicose veins suffer more frequently from haemorrhoids. So it is obvious that there can be a causal link between the two problems. In both cases it is a varicose system problem.

What naturally forms an integral part of solving this problem is also a daily care. There are many requirements on such a skin care product. Generally, it must reduce any friction in the area to a minimum. The used ingredients must be known for their anti-inflammatory and painkilling properties as well as for refreshing effects to treat possible itching. There comes to blood congestion in haemorrhoids and so it is desirable that the contained ingredients stimulate blood circulation and stop minor bleedings.

Thanks to its ingredients, HEMOSAN meets all the criteria mentioned. This preparation also has a very nice and refreshing smell.

Main ingredients: Vegetable oils: jojoba, soybean, walnut. Macerates: St. John's wort, horse chestnut, and marigold. Lecithin. Essential oils: Atlas cedar, juniper berry, frankincense, cypress, niaouli, sage, lavender, clove. Vitamins A, E, F.

Application: After washing the problematic area, treat several times a day with a required amount of the preparation. Due to the specific nature of the condition, the preparation should not be massaged in but only dabbed in most gently in the skin.

Always shake before use!

INCI: Simmondsia chinensis Seed Oil, Juglans regia Seed Oil, Glycine soja Oil, Canola Oil, Lecithin, Hypericum perforatum Leaf Extract, Aesculus hippocastanum Seed Extract, Calendula officinalis Flower Oil, Cupressus Sempervirens Leaf Oil, Helichrysum italicum Flower Oil, Boswellia carterii Oil, Salvia officinalis Oil, Cedrus atlantica Bark Oil, Melaleuca viridiflora Leaf Oil, Juniperus communis Fruit Oil, Lavandula angustifolia Oil, Eugenia caryophyllus Flower Oil, Tocopheryl acetate, Retinyl palmitate

Storage: The stated expiry date can be substantially extended by keeping the product in a dark and cold place (ideally in a fridge at 6–10 °C).

Best before the date indicated on the packaging. Batch number and volume are indicated on the packaging.
