

Code: 1901

A regenerative oil with aloe vera macerate at its heart. It is a very mild oil, also suitable for sensitive skin types. Using it will manifest itself already within a while by fresher and gentler complexion. It has also a beneficial effect on loose complexion and can be considered as an effective moisturizing factor. It has soothing and cooling effects and its application has worked well also with skin showing dermatitis symptoms, allergies and acne. Thanks to its main ingredients, which include aloe vera, borage oil, and sandalwood essential oil, it is recommended for normal skin and especially for dry skin.

Owing to the selected ingredients, the preparation may help to boost metabolic processes and keep the complexion supple and flexible. The active ingredients have antiseptic and deodorant properties. They return a youthful look to the tired complexion and prevent wrinkle formation. They provide complex protection against negative environmental effects. Regenerative oils also provide long-lasting hydration.

Main ingredients: Vegetable oils: soybean, jojoba, borage, karité. Lecithin. Essential oils: sandalwood. Vitamins A, E, F.

Application: Having washed your face, apply a few drops of the oil on the moist complexion and gently massage the forming emulsion into the skin. Facial oils are very economical compared to creams – 30 ml of regenerative oil corresponds to 150 ml of a regular cream. The skin doesn't look oily after application. It is suitable for all skin types. The oils don't produce any adverse effects and are tolerated even by very sensitive skin.

Information: Regenerative facial oils have a protection factor of at least 2, which prevents premature skin aging due to ultraviolet radiation.

INCI: Glycine soja Oil, Simmondsia chinensis Seed Oil, Aloe barbadensis Extract, Borago officinalis Seed Oil, Butyrospermum parkii Oil, Tocopheryl acetate, Santalum album Oil, Lecithin, Retinyl palmitate

Storage: The stated expiry date can be substantially extended by keeping the product in a dark and cold place (ideally in a fridge at 6–10°C).

Best before the date indicated on the packaging. Batch number and volume are indicated on the packaging.
