Vegetable oils represent not only suitable carriers for essential oils, but they are also a basis for macerated oils. Macerated oil is an infusion of a plant in oil, which absorbs the plant's active (lipophilic – soluble in oil) substances. This form of extraction is traditionally called maceration. In aromatherapy, macerates are a unique and integral part of massage and regenerative oils, creams, balms, and ointments.

**Physical properties:** Clear, slightly yellow oily liquid. It is obtained by macerating horse chestnut seed meal in a blend of oils.

**Freezing point:** Below -8 °C.

**Relative density:** At 20 °C approx. 0.92 g/cm<sup>3</sup>.

**Properties and application:** Regular external application can improve metabolism topically. It is present in preparations designed for legs, particularly for tired, swollen legs and for varicose veins. It can help in case of joint, muscle or ligament pains. In hair cosmetic preparations, it boosts metabolism and physiological functions of the scalp. It is included in regenerative oils and creams particularly intended for skin with couperose or spider veins. Horse chestnut oil is very gentle in massage, with good absorption and no shine afterward.

**INCI:** Glycine soja Oil, Aesculus hippocastanum Fruit

**Storage:** The stated expiry date can be substantially extended by keeping the product in a dark and cold place (ideally in a fridge at 6–10 °C).

Best before the date indicated on the packaging. Batch number and volume are indicated on the packaging.

**Producer:** 1. Aromaterapeutická KH, a. s. / Kšice 11, 349 01 Stříbro / Czech Republic/ E-mail: info@karelhadek.eu  
**Sales department:** Landline: Tel.: +420 371 140 900 / Vodafone: +420 777 618 398 / T-Mobile: +420 731 336 475 /
