

**AVOCADO**  
**Regenerative facial oil for mature skin**

Code: 1919

AVOCADO regenerative oil can be recommended particularly for sensitive, mature skin due to the high content of unsaponifiables, which make the skin softer. Other bioactive components of the avocado oil include a high content of vitamins A, E and F, as well as trace elements which activate its regenerative effects. The very pleasant smell of rosewood turns this preparation into a very interesting alternative for those who have “issues” with lavender. Owing to the selected ingredients, the preparation may boost metabolic processes and keep the complexion supple and flexible. The active ingredients are known for their antiseptic and deodorant effects. They return a youthful look to the tired complexion and prevent wrinkle formation. They provide complex protection against negative environmental effects. Regenerative oils also provide long-lasting hydration.

**Main ingredients:** Vegetable oils: avocado, jojoba, walnut, borage, karité, almond. Lecithin. Essential oils: rosewood. Vitamins A, E, F.

**Application:** Having washed your face, apply a few drops of the oil on the moist complexion and gently massage the forming emulsion into the skin. Facial oils are very economical compared to creams – 30 ml of regenerative oil corresponds to 150 ml of a regular cream. The skin doesn't look oily after application. It is suitable for all skin types. The oils don't produce any adverse effects and are tolerated even by very sensitive skin.

**Information:** Regenerative facial oils have a protection factor of at least 2, which prevents premature skin aging due to ultraviolet radiation.

**INCI:** Persea gratissima Oil, Simmondsia chinensis Seed Oil, Prunus amygdalus Dulcis Oil, Juglans regia Seed Oil, Borago officinalis Oil, Butyrospermum parkii Oil, Tocopheryl acetate, Aniba rosaeodora Wood Oil, Lecithin, Retinyl palmitate

**Storage:** The stated expiry date can be substantially extended by keeping the product in a dark and cold place (ideally in a fridge at 6–10°C).

Best before the date indicated on the packaging. Batch number and volume are indicated on the packaging.
