

ALTHEA

Regenerative cream for skin with potential signs of couperose

Code: 2004

The active ingredients found in the preparation may improve the functioning of facial capillaries, stimulate the blood flow, thereby potentially mitigating or eliminating the cosmetic defect known as „spider veins“. The cream can be used continually on a daily basis. Its components regenerate the skin. They keep the skin soft. They reduce capillary blood pressure.

Main ingredients: Vegetable oils: almond, soybean, jojoba, borage. Beeswax. Essential oils: lemon. Emulsifiers. Vitamins A, E, F. Beta-carotene, panthenol, water.

Application: Apply the ALTHEA cream to the face several times a day. Take care not to exert too much unnecessary pressure, which may disturb sensitive skin capillaries.

Information: To wash your face before applying the cream, we advise to use surfactant-free washing agents, since it is well known that surfactants deprive the skin of oil, drying it out. It is for this reason that soaps, even the liquid ones, are discouraged. Hydrophilic washing oils can be suggested as a better alternative.
