ATOP DERM is very mild, suitable for sensitive, itching, red skin with a propensity towards atopic dermatitis both in adults and children. It is worth mentioning not only its physiological emulsification, but also the fact that it is made without chemical preservation. It has a pleasant herbal fragrance. It provides oil to the skin and thanks to the essential oils it is soothing and may improve lymphatic circulation. The active ingredients may be helpful in detoxifying the skin. The cream's soothing effects also ensure a decent relief from itching skin. Thanks to the abundance of shea butter in the formula, the skin becomes softer and more supple with extended use.

Main ingredients: Vegetable oils: almond, evening primrose, borage, jojoba. Shea butter. St. John's wort extract. Beeswax. Lecithin.

Essential oils: juniper, chamomile blue, lavender. Emulsifiers. Vitamins A, E, F. Beta-carotene, panthenol. Lactic acid, allantoin, glycerin, distilled water.

Application: To achieve the maximum result, the preparation may need to be applied several times a day. Even after the skin has calmed down, the application should continue at least twice a day, that is in the morning and in the evening.

Tip: Given the possibility of atopic dermatitis, it may be useful to try also the LEMON BALM bath or shower oil.
